

BHAVEN PRAJAPAT

GenAI / Software Engineer | Full Stack Developer

+91 79748 80012 • bhavenprajapat8@gmail.com • Indore, Madhya Pradesh, India
linkedin.com/in/bhaven-prajapat-a31295287 • github.com/Bhaven-Prajapat1

PROFESSIONAL SUMMARY

MCA student and software developer with hands-on experience building full-stack and microservices-based applications using JavaScript, React, Node.js, Express.js and MongoDB. Developing practical GenAI skills in Python, LLM fundamentals, prompt engineering, LangChain, LangGraph and RAG pipelines, with experience integrating generative AI APIs into backend services. Strong foundation in REST APIs, system design, authentication, cloud deployment and problem solving.

EDUCATION

Master of Computer Applications (MCA) | Shri Vaishnav Vidyapeeth Vishwavidyalaya (SVVV), Indore | 2025 – 2027

Bachelor of Computer Applications | Makhanlal Chaturvedi University (MCU), Bhopal | 2022 – 2025 | CGPA: 7.07 / 10.0

TECHNICAL SKILLS

AI / GenAI: Python (fundamentals), LLM Fundamentals, Prompt Engineering, RAG Pipelines, LangChain, LangGraph (fundamentals), Gemini API, ChatGPT API

Backend: Node.js, Express.js, REST APIs, Microservices, WebSockets, JWT Authentication

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap

Databases: MongoDB, Mongoose, SQL, SQLite

Cloud / Tools: AWS S3, AWS ECS, Git, GitHub, Postman, VS Code, Netlify, Vercel

Core Concepts: OOP, MVC, API Integration, Async Programming, Debugging, Data Structures & Algorithms, Deployment

PROJECTS

AI Buddy Service | GenAI Backend | Node.js, Express.js, Generative AI APIs, LangChain

- Developed an AI-powered backend service for intelligent user interactions and integrated generative AI APIs into a microservices ecosystem.
- Implemented prompt-based AI functionality and connected the AI service with backend APIs and other application services.
- Built the service as part of a broader microservices-based e-commerce platform, combining GenAI capabilities with production-oriented backend architecture.

Microservices-Based E-Commerce Backend System | Node.js, Express.js, MongoDB, JWT, REST APIs, Nodemailer, Message Broker

- Developed a modular backend using microservices architecture for Authentication, Product, Cart, Order, Payment, AI Buddy, Notification and Seller Dashboard services.
- Implemented JWT authentication, inter-service communication, email notifications and payment workflow integration.
- Designed and deployed backend services with a focus on scalable APIs and service-level separation.

Spotify Clone | Full Stack + Microservices | React.js, Node.js, Express.js, MongoDB, AWS S3, AWS ECS, REST APIs

- Built a full-stack music streaming application using microservices architecture with Authentication, Notification and Music services.
- Integrated frontend and backend music APIs and implemented secure API communication.
- Used AWS S3 for music file storage and AWS ECS for containerized deployment.

INTERNSHIP / TRAINING

Full Stack Developer Trainee – Sheryians Coding School, Bhopal (Remote) | Jan 2025 – May 2025

- Completed the Job-Ready AI-Powered Cohort focused on Full Stack Web Development, DSA and Aptitude.
- Built real-world projects with the MERN stack and explored DevOps, microservices, AI integrations and Progressive Web Apps.
- Strengthened problem-solving through DSA and aptitude practice and built/deployed multiple full-stack applications.

CERTIFICATIONS & HIGHLIGHTS

- Completed the Job-Ready AI-Powered Cohort from Sheryians Coding School covering Full Stack Development, DSA, DevOps and Microservices.
- Participated in the Sheryians Frontend Hackathon.
- Solved 100+ Data Structures & Algorithms problems on LeetCode.
